

Online application

Easy and useful, allows carers to check if everything is alright and to make sure that the activity of Colette is ok.

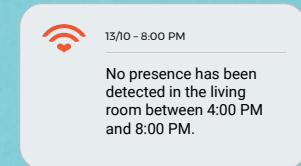

Take care everyday

In case of an abnormal activity detected, the telecare platform is immediately informed. Assistance is sent if necessary.

Julien,
the teleoperator

Sylvie,
Colette's daughter

Colette
She lives as usual,
Otono-me watches over.

« I completely forget Otono-me, the service is transparent for me and I feel better surrounded. »
Jacques, 75 years old

She consults her application everyday
and personalizes her service.

Innovative telecare

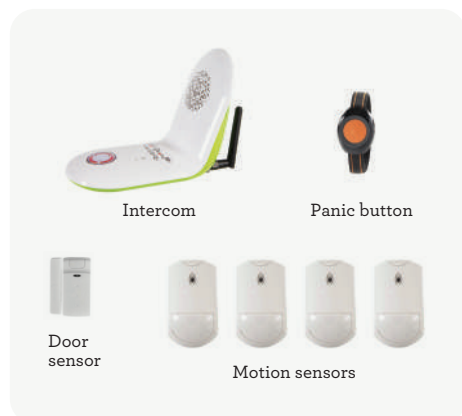

Innovative solution

Otono-me improves the security of frail people living alone at home and reassures carers everyday.

Discreet sensors

The service can be installed in any kind of housing without internet connection needed.
