

With Otono-me, it has never been easier to remotely monitor a loved one

+ Be reassured and connected on a daily basis

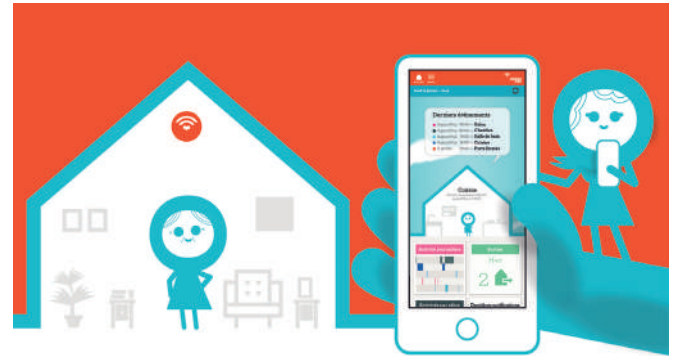

Otono-me is the connected solution that allows families to monitor their loved one so that he or she can live safely at home.

+ Be informed in just a few clicks

- > Knowing that everything is ok thanks to the app.
- > Receiving customised SMS notifications.
- > Being warned in case of danger.

+ For the person with the system

- > Sensors are discreet. The person is never filmed or listened in on, so his/her personal privacy is protected.
- > Installed in any type of housing without requiring an internet connection or a telephone subscription.

"When my father doesn't answer his phone, I check my app and I am reassured."
Jean, 52, Jacques's son

"The Otono-me service allowed me to postpone my mother's stay at a retirement home for 18 months!"
Marianne, 59, Paulette's daughter

HOW DOES IT WORK?

Monitoring: *An online app for relatives*

Practical and customisable, it allows people to be kept informed easily.

Alerting: *Automatic detection in case of danger*

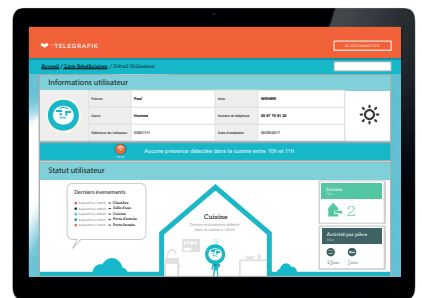

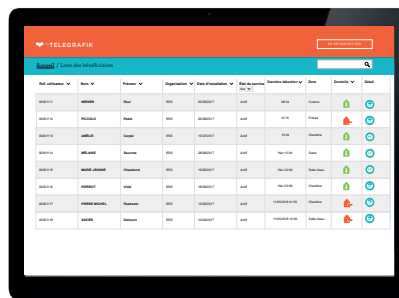

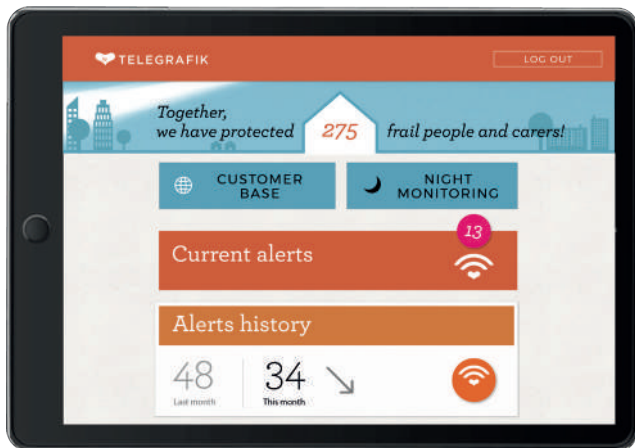

If any danger is detected (e.g.: fall, fainting), an alert is automatically sent. The emergency centre option allows helpers to rely on a professional staff being available 24/7.

Supporting: *A high added value service for beneficiaries and residents*

For a better support of beneficiaries on a daily basis:

- > Logged alerts.
- > Notification of prevention and weak signals.

TELEGRAFIK

- > Otono-me is a service offered by Telegrafik, a Smart Care services operator since 2013
- > Telegrafik won the BPI France 2017 Digital Innovation Competition
- > Service available throughout France
- > Learn more about Telegrafik: www.telegrafik.eu
